

Maliba Lodge 4x4 Routes

Eco-friendly 4x4

- Show respect to the villagers – slow down for people and animals and remember to smile and wave – it is their homesteads you are driving through
- Ensure that your vehicle has the necessary capabilities to drive the trail (4 wheel drive, low range, diff lock, etc.). If you are unsure if your vehicle will be able to drive the trail, rather don't attempt the trail. All the Maliba trails will require the use of low range at some point
- Never drive the trails in 2x4 as this will cause excessive damage to the track
- Select the right gear – don't drive in high range if the track is more suitable for low range
- Avoid wheel spin as this cause erosion of the track
- Always stay on the trail and do not create new tracks
- Have proper recovery equipment in the vehicle in case of getting stuck
